

BE SECURE: Monitor your home via SMS

HOME/BUSINESS/CARAVAN/MARINE SMS ALARM

**EASY
TO USE
& INSTALL**

*Receive SMS Alerts
from your alarm!*

The Watchguard™ SMS 2010 is a true revolution in monitored home & mobile security systems. It has been designed specifically to provide simple installation and maximum protection.

The Watchguard™ SMS 2010 can be used across a range of applications, including caravans, garages or anywhere where a portable, self-monitored alarm is required. It is a sophisticated alarm system, utilising the latest in GSM communication and wireless alarm technology (SIM card required).

The Watchguard™ SMS 2010 communicates to your mobile via GSM. The SMS enables 2-way communication via SMS text messaging between you and your alarm.

Package Includes:

- 1 x 8 Zone Alarm Controller Unit with Built-in GSM
- 2 x Wireless Movement Sensors
- 2 x Code Hopping Remote Controls
- 1 x 12V DC Power Supply for the Alarm Controller Unit
- 1 x Compact External Siren with Strobe

How The System Works:

Plug & Play Setup

1

Home security has never been so easy to install. After mounting the movement sensors in the zones to be monitored, and the siren in a visible area, simply plug the alarm module into a power pack, turn the power key to 'on' and you're ready to go!

Arm the Premises

Use your Remote Control to arm the Watchguard™ Wireless Alarm System to secure your premises. When body heat is detected in the premises, the sensors will send a message to the alarm module.

3

8 Zone Alarm Module with Built in GSM Modem

This is the 'brain' of the system. When it receives the message from the Wireless Movement Sensors, it automatically sends your reported alarm to your mobile as an SMS. The internal siren will also trigger, repelling the intruder.

4

Alarm Notification

The Watchguard Digital SMS alarm module communicates to your mobile phone via GSM. When triggered, the module sends a detailed SMS of the reported alarm to your mobile. A voice message may also be sent to a landline telephone, where supported.
