

# MODEL: NVR4ENT(PACK)2

# **Professional IP Surveillance Pack**

# Network Video Recorder with 4 Security Cameras

# 'QUICK INSTALLATION GUIDE'

#### NVR

- Advanced H.264 Video Compression Technology
- Multiplex Operation
- Long Recording Duration
- Intelligent Video Motion Detection Recording
- Remote Network Surveillance & Backup Functions
- Easy to operate with USB Mouse.
- System Auto recovery after power loss (blackout)

#### 4 x IP Day/Night Cameras

- High Quality 1.3MP CMOS Image sensor
- IR Night view range of 20 metres
- 720p Resolution

#### In-Built POE Network Switch

- Centralise your cameras away from your NVR
- Power and video over the same cable
- View over the internet via Smartphone or PC

#### HDD NOTE:

This NVR is designed to only work with 24hr rated Enterprise, NAS and Video Surveillance Hard Drives. The use of any other model Hard Drive (including energy efficient drives) may cause your system to fail and void Warranty. NVR Packs come with an approved Hard Drive already installed.

We strongly recommend using the following Seagate Hard Drives:

Name:
Seagate 1TB Video HDD
Seagate 2TB NAS HDD
Seagate 3TB NAS HDD
Seagate 4TB NAS HDD

Model: ST1000VM002 ST2000VN000 ST3000VN000 ST4000VN000 Part Number: HD1TBSN HD2TBSN HD3TBSN HD4TBSN

# NVR4ENT2 Package Contents (Before installation, please ensure you have all the parts listed below).

and the second sec	<ul> <li>1 x Network Video Recorder with 1TB Hard Disk Drive</li> <li>Advanced H.264 Video Compression Technology for High Quality Images</li> <li>Easy to Operate</li> <li>Can be Connected to a PC Network for Remote Viewing &amp; Backup (Software on Disc)</li> </ul>

# Installation

Before installing this unit, please read through the following points:

- Do not place cords from the AC adapter where they can be pinched or stepped on.
- Leave at least 50mm of space between the NVR and other objects to allow air circulation.
- Do not expose the NVR or Cameras to excessive heat, cold, or moisture.
- Never immerse any component in water, and do not spray cleaners of solvents on the unit. Unplug units before cleaning. When cleaning, use a damp, lint-free cloth only.
- Do not place heavy objects on cords, or cover cords with rugs or carpet.
- Service should be handled only by qualified technicians.

#### **Rear Panel**

#### WARNING

Please ensure you use the correct power supply for each component. Plugging either Power supply into the wrong deice cause damage to it.

1	"DC48V"	Connect to 48V power supply.	
2	"POE PORTS"	Powered Ethernet ports to connect to supplied cameras.	
3	<b>"WAN PORT"</b>	Connect to Network/Internet for remote monitoring.	
4	"HDMI"	Connect to Digital Monitor with supplied HDMI cable.	
5	"VGA"	Connect to monitor using VGA cable. (Not Supplied)	
6	"DC12V"	Connect to 12V power supply.	
7	"GROUND"	Ground point.	

# **Connection Guide**

- 1. Mount the 4 Cameras as required and connect them to the in-built POE Network Switch using the supplied Network Cables.
- 2. Connect the **48V Power Supply** to the in-built POE Network Switch portion.
- 3. Connect the **12V Power Supply** to the NVR portion.
- 4. Plug both power adaptors into a Power-point.
- 5. Switch NVR on. Hold Power button for 3 seconds.
- 6. The power LED at the front of the NVR should now be illuminated and the unit will make a loud beep sound to indicate it is powered.
- 7. Connect the included mouse to the USB port on the front or back..
- 8. Connecting your local network or modem to the LAN Port of the NVR (we recommend doing this last step after all the cameras have been configured).

# Front Panel

Ċ	Power indicator light	The blue light becomes on when the power connection is OK.
88	Network status indicator light	The blue light becomes on when the network connection is abnormal or offline.
8	HDD status indictor light	The red light becomes on when HDD is abnormal or HDD space is below the threshold.
÷	USB	USB port. Connect to USB storage device, mouse etc.

# Main Screen

Once booted, you will be presented with the screen below (camera may only be black if not yet set up). Each camera view will have one or more symbols from below:

1	00	Currently Recording	3	?	Video Loss
2	M	Motion Detected	4		Camera Lock

#### \*NVR4ENTPACK2 only supports four cameras.

#### System Menu

- Right Clicking will bring up the System Login screen and the onscreen keyboard.
- Once Logged In, right clicking again will bring up a menu.
- Selecting "MAIN MENU" will show the system menu.
- Right click or press the ESC button to return to previous menus, click on the icon to enter menus.

# **Channel View Menu**

Moving the mouse to the top of each channel in the live view screen will show a menu. From left to right:

- Playback: Show, in live view, the past few minutes of footage.
- Search tag: Turn on search tag.
- Save: Save the currently displayed file to USB device.
- Camera Source: Change the IP Device for this feed.
- Close: Close the channel view menu.

#### Default:

The default username is **admin,** the password is also **admin.** On the NVR physically, you may also use username of **888888**, and the password **888888**.

(Users can alter the password later. Please refer to the Advanced set up guide CD)

# Set the Time and Date

When using your NVR for the first time, you will have to set the SYSTEM TIME.

- Right clicking anywhere on the screen will bring up the password menu. Use the mouse to enter the NVR admin password with the on-screen keypad.
- Then Right click to open the menu and select "MAIN MENU".
- Select "SETTING"
- Select "GENERAL"
- Set System Time, Date Format and DST (Daylight Saving Time) for your region.
- Click Save before clicking OK

#### Important:

If you change the date or time on your NVR after the recording function is activated, the recorded data may be deleted. After setting the date and time, it's recommended to clear all HDD data, and start recording again.

		GENERAL	
System Time	2012 - 09 - 17   12 :	27 : 47	Save

# **To Connect Cameras**

#### NOTE:

The NVR is designed to automatically configure the IP cameras which are camera connected to the dedicated POE Ports on the back of the device. However you can still manually add the cameras when they are connected via the local LAN.

- Right click to open the menu and select "MAIN MENU".
- Select "SETTING"
- Select "REMOTE DEVICE"

#### Adding Cameras that are not on the Inbuilt POE Ports:

- 1. Click IP Search, this will list all cameras connected in the upper panel.
- 2. Click on the camera you wish to connect and click 'Add'

#### Manual Adding Cameras that are not on the Inbuilt POE Ports:

- 1. Click Manual Add
- **2.** Enter the information about the camera, if you do not know this information, you must manually setup the camera on another network before connecting.

	Manual Add	_

#### Record Times:

The NVR4ENTPACK2 system is capable of storing up to 2 weeks of recorded footage based on 1Tb of storage and the 4 included 1.3MP Cameras set to 720P @ 10fps and CBR @ 1536kb/s

Right click to open the menu and select MAIN MENU, then select SETTINGS followed by ENCODE.

1		ENCODE
Channel	1	
Туре	Regular 💌

	OVERLAY	
	SNAPSHOT	<i>t</i> :
Copy P	'aste ) ( Default	Pre Step Next Step Cancel

Here you may can set individual encoding options for **Regular**, **Motion Detect** and **Alarm** Recording. While any of the cameras may be set higher, please be aware that it will reduce the total recording time to less than 2 weeks. We recommend:

1MP cameras: Set to H.264 with a 1280x720 resolution, 10fps, Bit Rate CBR of 1536kbps. 2MP cameras: Set to H.264 with a 1920x1080 resolution, 10fps, Bit Rate CBR of 2048kbps.

**Important:** The EXTRA STREAM MUST be enabled if you wish to remote access the NVR system. **All cameras:** Set to **H.264** with a **CIF** resolution, **10fps**, Bit Rate **CBR of 320kbps**.

# **To Begin Recording**

Once you have successfully set up the cameras, exit the Menu by right clicking or pressing the CLOSE button. By default, the NVR will begin recording when it is properly connected to the cameras and has an

installed HDD. If it is recording, the recording icon "

#### Automatic Overwriting:

When the system is in full, the oldest recorded data will be overwritten automatically. **This NVR System is set to Overwrite by factory default** but can be changed in the "**GENERAL**" Menu.

# To Set a Cameras Colour Settings

1. Right click to open the menu and select MAIN MENU, then select REMOTE DEVICE

3. Here you can adjust the IP Cameras Colour, Gain, BLC, WDR and Day/Night.

Please ensure that Day/Night is always set to Auto. Failing to do so could mean the Cameras are unable to see at night, or become stuck in black/white during the day.

# **Motion Detection**

Should you wish to use Motion detect recording, it can be set per camera, per time period and to detect in certain portions of the screen.

- Right click to open the menu and select "MAIN MENU".
- Select "SETTING"
- Select "DETECT"
- Select 'Motion Detect' from Event Type
- Select channel from Channel drop down
- Check the Enable box
- Ensure Record Channel is checked, and a Region has been selected.
- Click Save.

#### More Settings:

Latch	Time to wait after motion is detected, before checking for motion again.
Region	Select region of feed within which motion detection will occur.
Select	Click and drag with the mouse to arm/disarm areas of the feed.
	Motion detected in red areas will cause recording, motion will not be detected in
	grey areas. Press "ENTER" to save.
Sensitivity	Select from 1 to 6 the sensitivity of the recording, 6 being the most sensitive to
	movement.

- Right click to open the menu and select "MAIN MENU".
- Select "SETTING"
- Select "SCHEDULE"
- Select a channel.
- Choose a period and set the time options to the period you wish to motion record, bearing in mind system uses **24 hour time**.
- Check **MD** for this period.
- Click **OK** to save.

# How to Playback Video Footage on your NVR

- 1. Right click anywhere on the screen to bring up the menu and log on. Use the mouse to enter the NVRs admin password "888888" with the on-screen keypad.
- 2. Once logged in you can left click to open the menu and select SEARCH.
- **3.** You will now see the NVR search screen. On the right hand side there is a calendar in which you can select the month and day you wish to playback. Any date that is highlighted blue has video available to playback.
- 4. Once you have selected the day, you can choose which cameras you wish to playback, and the mode in which they will be displayed (1ch, 4ch, 8ch, 16ch at a time).
- 5. Finally you can select the time from the time bar at the bottom of the screen. You will notice that the hours are listed from 00:00 to 24:00. Simply clicking on the bar will display the video footage from that time. A green bar will indicate that there is video available at that time.

# How to Backup Video Footage on your NVR

- 1. Right click anywhere on the screen to bring up the menu and log on. Use the mouse to enter the NVRs admin password "888888" with the on-screen keypad.
- 2. Once logged in, you can now left click to open the menu, select MAIN MENU then BACKUP.
- 3. You will now see the NVR Backup Devices where you can choose the device you wish to backup to. Choose your device and click BACKUP to continue.

6	5		BACKUP

	Page Down Fn Select/C		
Space Require	d / Space Remaining:0.00 KB/		Start )

5. Once you have selected all the video to be backed up, press Start to begin the transfer process.

In order to backup Video Footage from your NVR you will first require a USB Stick or USB Hard Drive (we strongly recommend having a FAT32 file system).

# Using a PC to find available IP Addresses

Before setting up your NVR you will first need to find it an IP address, along with all your IP Cameras. This process is to help you find what IP Addresses are currently in use on your computer network, and in turn which ones are still available. If you are not connecting the NVR to a computer network (or internet connection) then any default IP address range may be used like *192.168.0.100* to *192.168.0.130*. *We recommend 192.168.0.100* 

Before starting you must first have a copy of the "Free IP Scanner" Tool which can be downloaded here: <u>http://downloads.rhinoco.com.au/dvr/Free IP Scanner.zip</u>

- 1. Open the Free IP Scanner Tool (if it asks for registration just press skip as it is free to use).
- 2. Begin the scan by clicking on
- The "Free IP Scanner" will automatically detect all IP Addresses on your Computer network and display which ones are in use by listing with a Green tick beside them.
   ✓ 10.1.1.2 WORKGROUP PC N/A 48-5B-39-91-65-54

Those which h	ave a red cros	s beside them	are not current	ly in use and may be available.
🗱 10.1.1.100	N/S	N/S	N/S	N/S

Note: Even though lower numbered address may be free (such as "?.?.8") we recommend using higher number which are unlikely to be used in the immediate future such as "?.?.100" onwards.

4. If you wish to Export the list, you can do this by going to FILE and choosing EXPORT. It can then be saved as text file and even emailed.

# Set Up the NVRs Networking

Right click to open the menu and select MAIN MENU, then select SETTINGS followed by NETWORK.

The device comes pre-configured to DHCP (which means it will automatically receive an IP Address). If you wish to manually give it an IP Address, un-tick DHCP and then enter the IP Address, Subnet mask, and Gateway.

	NETWORK
IP Address	192 · 168 · 0 · 100 DHCP
Subnet Mask	255 . 255 . 255 . 0
Gateway	192 . 168 . 0 . 1
TCP Port	37777 HTTP Port 80
UDP Port	37778 RTSP Port 554
Max Connection	20 MTU 1500
Preferred DNS	8 . 8 . 8 . 8
Alternate DNS	8 . 8 . 4 . 4
	LAN Download
NETWORK SE	TING
Default	Save Cancel

In this example we have used 192.168.0.100

The inbuilt POE Switch uses a different IP address range that will in no way affect your network or the NVR. This can be found under NETWORK SETTINGS and then double clicking on SWITCH SETTINGS. While these settings can be changed we strongly recommend leaving it at its default configuration:

 IP Address:
 10.2.2.2

 Subnet Mask:
 255.255.255.0

 Gateway:
 10.2.2.1

# How to use an external POE Switch NVR (optional)

1	"240V"	Connect to 240V power.
2	"POE"	Connect IP Cameras here.
3	<b>"VIDEO OUT</b> "	BNC Analogue Video Out connection.
4	"MIC"	BNC Analogue Audio In/Out connection.
5	"RS323"	RS323 connector for optional terminal configuration.
6	"ALARM INPUT"	Alarm Input /Output panel
7	"POWER"	Switch on/off to supply power to the device.
8	<b>"USB PORT</b> "	Connect USB Mouse.
9	"LAN PORT"	Connect to Network/Internet for remote monitoring.
10	"HDMI"	Connect to Digital Monitor with supplied HDMI cable.
11	"VGA"	Connect to monitor using VGA cable. (Not Supplied)
12	External POE Switch	Connect manually added IP Cameras here.
13	POE Switch Power	Connect 48v POE Switch Power here
14	Modem	Connect to your modem or LAN

# Using the NVR to manually set the IP Address of an IP Camera (optional)

- 1. Right click to open the menu and select MAIN MENU, then select REMOTE DEVICE
- 2. Click IP SEARCH **PSearch** to begin scanning for all the attached IP Cameras.

Delete (Ma	nual Add)			OK		•

4. Change the IP Cameras IP Address, Subnet mask, and Gateway to the new IP address range. Then click Ok to save. The camera IP Address must be in the same range as your NVR. *In this example we have used 192.168.0.101*  **5.** The IP Camera should now be listed with its new IP Address. You can then tick the new camera you wish to connect and click 'Add' to have it connect to the NVR.

7. This process can now be repeated for any additional cameras.

# Simple Configuration of your NVR for Remote Access by QR code

## To be able to set your NVR up for Remote Access, you will first require:

- □ An ADSL internet connection of 512/512 minimum (ADSL2 or NBN recommended).
- □ A network cable between your NVR and your Modem.
- □ An iPhone with the iDMSS App or an Android smartphone with the gDMSS App.

## Once you have these you can proceed to set up the Remote Access by:

- 1. Connect your NVR to your Modem by a network cable.
- Under Main Menu > Settings > Network.
   Enable DHCP or enter your local network address information.
- 3. Exit to save.
- 4. Now go to Main Menu > Settings > Network > Network Settings. Tick the box for P2P.

Then double Click P2P to open up the sub menu.

- 5. Ensure "Enable" is ticked. Then Click Save to exit.
- 6. You can now set up the DMSS Mobile App by QR Code.

# DMSS Mobile App by QR Code

#### App available for Android, iOS, Blackberry, Symbian, Windows Mobile and Windows 7 mobile

From your compatible Smartphone, access the App Marketplace and download the free App. This may also be listed as:

iDMSS lite for Apple iOS gDMSS lite for Android DMSS lite for others iDMSS plus for Apple iOS gDMSS plus for Android

#### **Configuration:**

- On your NVR go to Main Menu > Settings > Network > Network Settings. Tick the box for P2P. Then double Click P2P to open up the sub menu.
- **2.** On your Smartphone go to "**MENU**"  $\equiv$  then "**Device manager**" and select "**ADD**"  $\oplus$ .
- 3. Set "Register Mode" to "P2P"
- 4. You can now click "Scan QR Code" and use your phone to scan the code on your NVR.

- 5. Enter in your devices NAME.
- 6. Enter your Username / Password and the set Live Preview and Playback to "Extra".
- 7. You can now select "Start Live Preview" to save and test the connection to the NVR.
- 8. In the future, you can connect to your system directly from the main screen by tapping the "DEVICE LIST" = then ticking your NVR and selecting the "Start Live Preview" to connect.

# Advanced Configuration of your NVR for Remote Access by IP Address (optional)

**Important:** Before Setting up remote access for your NVR, you will need a good understanding of computer networks. If you do not, please seek the assistance of a qualified I.T. professional.

#### To be able to set your NVR up for Remote Access, you will first require:

- □ An ADSL internet connection of 512/512 minimum (ADSL2 or NBN recommended).
- □ An ADSL Modem which supports Port Forwarding (such as Sapido, D-link or Netgear).
- □ An "External static IP address" from your Internet Service Provider.
- □ An "Internal Static IP address" from your Modem.
- □ A network cable between your NVR and your Modem.
- □ A windows PC on your network to configure your modem.

#### Once you have these you can proceed to set up the Remote Access by:

- 1. Give your NVR the internal IP Address.
- 2. On the NVR change port 80 to port 88.
- 3. Ping the NVR from a local computer to ensure it is reachable on your network.
- 4. Port forward ports 88, 37777, 37778, 554 in the modem, to the "Internal IP address" of the NVR.
- 5. You should then be able to test the connection to the NVR over the internet from a different internet connection (or mobile on 3G).

#### Test your Remote Access by connecting to the NVR:

When you are in the same building as the NVR you will be able to connect via WIFI and use the "Internal IP address" of the NVR. However when you are not where the NVR is and wish to connect via the internet or 3G, you would use the "External static IP address" given to you by your Internet Service Provider.

#### Port forwarding support:

There are many different brands and models of ADSL Modems which makes them difficult to set up, this is why we must recommend an IT professional. Some manufacturers offer guides on their websites or alternatively we can recommend Third-party assistance on configuring port forwarding from sites such as: <u>www.portforward.com</u>

#### When using more than one DVR on a site:

Should you have more than one NVR on site it may be necessary to set the second machine to a different set of ports. For example set NVR 1 to port 88 and then NVR 2 to port 89.

# Set up DDNS on your NVR (optional)

DDNS is a service that will track your numeric IP address and allow you to attach an alphanumeric address. So for example, instead of using "123.123.123.123" (the Google address) you would use "google.com".

#### Why use DDNS?

Remembering a numeric ip address can be complicated, where an alphanumeric address is easy to remember. The other main advantage for DDNS is If you have a dynamic IP Address, (where your address can change monthly) the DDNS service will track and update with your new IP Address automatically. So no matter what your numeric IP Address is, your alphanumeric address will work. There are free and paid services available, however a free DDNS service has been built in to these NVRs. This tutorial will go over how to set up your NVR to use the free DDNS service.

#### How to enable your DDNS?

In order to set up DDNS on your NVR4ENTPACK2, you will need to enable the DDNS service in the Network settings. MENU > SETTING > NETWORK > NETWORK SETTING > DDNS (double click).

Set DDNS Type to "Private DDNS" and Tick ENABLE

SERVER IP to www.dahuaddns.com

DOMAIN MODE to "Default Domain"

DOMAIN NAME is your unique <MAC address>.dahuaddns.com

Username is left Empty

# Now when trying to connect externally you would now use the CURRENT HOST ADDRESS instead of the internal IP address.

e.g. <MAC address>.dahuaddns.com

(Note: This is also dependent on Port forwarding being set up in your ADSL modem. Please use the default unique ID not <MAC address> as it is just an example).

8	DDNS			
DDNS Type Server IP	Private DDNS Enable			
Port	80			
Domain Mode	Default Domain O Custom Domain Name			
Domain Name	52544CFAADAF .dahuaddns.com			
User Name	Please input email address.			
Note: System will reclaim the domain that is idle for more than one year. You can get a notification email one month before the reclaim if your email address setup is right.				
Default	Test OK Cancel			

# How to enable ActiveX Controls in Internet Explorer (optional)

**Important:** Before Setting up remote access for your DVR, you will need a good understanding of computer networks. If you do not, please seek the assistance of a qualified I.T. professional.

We can only recommend using ActiveX Internet Explorer 5.5 or above, and strongly recommend the use of IE9 as unfortunately IE10 is not compatible.

To enable ActiveX controls go to: Tools > Internet Options > Security > Custom Level > Then once in the Security Settings, enable all ActiveX related options. Please see the settings below:

Security Settings - Internet Zone	×
Settings	
ActiveX controls and plug-ins <ul> <li>Allow previously unused ActiveX controls to run without prom</li> <li>Disable</li> <li>Enable</li> <li>Allow Scriptlets</li> <li>Disable</li> <li>Enable</li> <li>Fnable</li> <li>Prompt</li> <li>Automatic prompting for ActiveX controls</li> <li>Disable</li> <li>Enable</li> <li>Enable</li> <li>Prompt</li> <li>Enable</li> <li>Disable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> <li>Enable</li> </ul>	*
<ul> <li>Display video and animation on a webpage that does not use</li> <li>Disable</li> <li>Enable</li> </ul>

# DMSS Mobile App by IP Address (optional)

#### App available for Android, iOS, Blackberry, Symbian, Windows Mobile and Windows 7 mobile

From your compatible Smartphone, access the App Marketplace and download the free App. This may also be listed as:

iDMSS lite for Apple iOS gDMSS lite for Android DMSS lite for others

#### **Configuration:**

- 1. Go to "MENU" (a) then "Device manager" and select "ADD" (b).
- 2. Set "Register Mode" to "IP/DOMAIN"
- 3. Enter in your devices NAME, IP Address or DDNS and TCP Port (default is 37777).
- 4. Enter your Username / Password and the set Live Preview and Playback to "Extra".
- 5. Select "SAVE" (a) in the top right corner or "Start Live Preview" to save and connect.
- 6. You be returned to your Live View screen where your camera feed will now be displayed.
- 7. In the future, you can connect to your system directly from the main screen by tapping the "DEVICE LIST" <sup>(■)</sup> then ticking your NVR and selecting the "Start Live Preview" to connect.

# Troubleshooting

Please refer to the FAQ table below for easy troubleshooting. The table below describes some typical problems and their solutions. Please consult these guides before contacting your NVR dealer.

PROBLEM	SOLUTION	
No power	<ul> <li>Check power cord connection.</li> <li>Confirm that there is power from the outlet.</li> <li>Ensure that the 12V PSU is connected to the NVR</li> </ul>	
Motion Detection not working	- Ensure that motion detection is enabled for that channel in the "DETECT" menu.	
No live video	<ul> <li>Check the cameras cable and connections.</li> <li>Check the monitors cable and connections.</li> <li>Check that there are no cameras set to 3MP.</li> <li>Ensure you are not in playback mode.</li> <li>Ensure that the 48V power supply is connected to the switch and the 12V is connected to the NVR</li> <li>Turn the NVR off and power on while holding the SHIFT button.</li> </ul>	
No video over the network with web browser or mobile	- Make sure that Extra Stream is enabled for each camera on the NVR.	
No recorded video	- Check if the HDD is installed and connected properly.	
NVR keeps rebooting	- Ensure that the <b>12V 5A</b> is connected to the NVR	
HDD detection failed	- Ensure that the 12V 5A is connected to the NVR	
Can't detect your USB flash drive	<ul> <li>Use another USB flash drive to test.</li> <li>Ensure it is formatted to FAT32.</li> <li>Check Appendix B of User manual (on CD).</li> </ul>	
Can't view the NVR images over the network with web browser	<ul> <li>Ensure you have installed the ActiveX</li> <li>Check Section 8 of User manual (on CD).</li> </ul>	

This guide is intended as a Quick Set Up and Basic use manual only, please refer to the User Manual on the included CD for all other details.

## **Limited Warranty**

Cornick Pty Ltd (Seller) warrants its products to be in conformance with its own plans and specifications and to be free from defects in materials and workmanship under normal use and service for twelve months from the date of original purchase. Sellers obligation shall be limited to repairing or replacing, at its option, free of charge for materials or labor, any part which is proved not in compliance with Sellers specifications or proves defective in materials or workmanship under normal use and service. Seller shall have no obligation under this Limited Warranty or otherwise if the product is altered or improperly repaired or serviced by anyone other than Seller.

For Warranty Service: Return transportation prepaid with a copy of your purchase receipt and contact details to:

#### RhinoCo Technology, 9 Hannabus Place, McGraths Hill, NSW 2756 Australia.

Seller has no obligation to attend the buyer's location to retrieve the goods or make repairs onsite.

- There are no warranties, expressed or implied, of merchant ability, or fitness for a particular purpose or otherwise, which
  extend beyond the description on the face hereof. In no case shall seller be liable to anyone for any consequential or
  incidental damages for breach of this or any other warranty, express or implied, or upon any other basis of liability
  whatsoever, even the loss or damage is caused by its own negligence or fault.
- Seller does not represent that the products it sells may not be compromised or circumvented; that the products will prevent
  any personal injury or property loss by burglary, robbery, fire or otherwise; or that the products will in all cases provide
  adequate warning or protection. Customer understands that a properly installed and maintained alarm system or video
  surveillance system may only reduce the risk of a burglary, robbery, or fire without warning, but it is not insurance or a
  guarantee that such will not occur or that there will be no personal injury or property loss as a result.
- Consequently, seller shall have no liability for any personal injury; property damage or other loss based on a claim the
  product failed to give any warning. However, if seller is held liable, whether directly or indirectly, for any loss or damage
  arising under this limited warranty or otherwise, regard less of cause or origin, seller's maximum liability shall not in any
  case exceed the purchase price of the product, which shall be the complete and exclusive remedy against seller.
- This warranty replaces any previous warranties and is the only warranty made by the Seller on this product. No increase or alteration, written or verbal, of the obligations of this Limited Warranty is authorized.

Please refer to the website (www. watchguardalarms.com.au) for a full list of trading terms.
