

Watchguard 16 Channel H.264 Network DVR

with Push Video Notification **NEW**

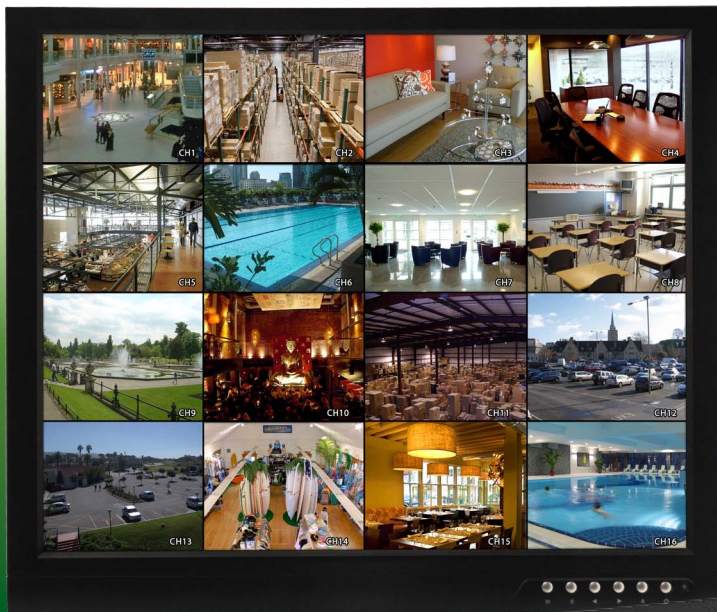

The Watchguard DVR16ENT2 features Push Video Notifications, with an alarm sensor connected to the DVR, it can send **Push Video** to your iPad, iPhone and Android mobile device for instant event notification. The DVR16ENT2 is one of our Real-Time 16 Channel H.264 Network DVRs, and it is the ideal product for use in a home or small business, when the owner is after a high quality Digital Video Recorder with entry level functions.

The DVR utilises H.264 video compression technology, which allowing the system to record full D1 resolution images without increasing the resulting file size. This maximises the amount of footage which can be stored on the internal hard drive. Installation and setup of the DVR couldn't be easier thanks to the "Plug and Play" setup and user friendly On-Screen Menu.

The OSD can be easily navigated using the included USB mouse, the DVR Front Panel or operated wirelessly by using the included IR remote control. Recorded video footage and images can be viewed and played back on the DVR. When you need to retrieve the video footage from the DVR, simply use the OSD to backup the footage to a USB Flash Drive via the external USB port, or backup the footage to a remote PC via a network.

Model Features:

- Push Video Notification
- USB Mouse Control with GUI OSD
- Intelligent Motion Recording
- H.264 Video Compression Technology
- Remote / Mobile Surveillance
- Live, Record, Playback, Backup and Network operation at the same time
- USB and network backup

Monitor from your Smartphone!

Supporting popular smartphone operating systems such as iOS, Android, Blackberry OS and Windows Mobile.
