All You Need In 1 Box!

Complete 4 Channel H.264 Digital Video Surveillance Kit with 18" LCD Monitor

Utilising the latest H.264 video compression technology, the Watchguard DVR4ENTPACK3+M complete surveillance package is ideal for a home or small business wanting to set up a digital surveillance system with network and remote access.

It features H.264 Video Compression Technology - allowing for higher resolution image recording with smaller file sizes, Multiplex Operation allowing live display, record, playback and network operations simultaneously and Intelligent Video Motion Detection recording. This complete surveillance package contains everything needed to set up the system with a 4 Channel Digital Video Recorder with 500GB hard drive, 1x 18" LCD Monitor, 4 10M IR Day/Night weatherproof cameras (Rated IP67), power supplies and camera connection cables (2 x 10m, 1 x 20m, 1 x 30m). The system has been designed to allow quick and easy installation and comes with an easy to follow operation manual.

The DVR can record up to 25 image frames per second per camera at D1 resolution (704 x 576). You can adjust the recorder settings for both image quality and frame rate, and when the HDD is full, you can set the DVR to automatically record over the oldest footage. If connected to a windows PC network, footage can be viewed over the network using the included software. If the network has a high-speed Internet connection, footage can also be viewed remotely over the Internet. The software also enables footage to be backed up / archived from the DVR to a PC allowing storage on another HDD or burning to a DVD or CD.

*Please note: The Eagle Eyes application is not developed nor distributed by RhinoCo Technology, therefore we are unable to provide service or troubleshooting for issues arising from the use of the app.
