GPRS / GSM Input / Output Communicator

SIM card independent 4 band GSM/GPRS modem built in Encrypted GPRS -TCP/IP communication 24/7 connection to Monitoring Station Backup server connectivity Standard phone set connectivity for voice communication Security control panel features such as arming and disarming with proximity cards Two way , elevator standard compatible rescue communication module Backup for obsolete PSTN lines Limited BMS features 16 EOL zones RS485 connectivity 4 different kind of input 3 programmable output Remote controllable by SMS or by ETMS Monitoring Software Receiving and forwarding SMS Local programming by RS232 port Password protection AC fail delay 2 way voice connection Volume control by software Windows programming software (Windows 98, 2000, XP, Vista)

Features:

- SIM card independent 4 band GSM/GPRS modem built in
- Encrypted GPRS -TCP/IP communication
- 24/7 connection to Monitoring Station
- Backup server connectivity
- Standard phone set connectivity for voice communication
- Security control panel features such as arming and disarming with proximity cards
- Two way , EN 81-82 elevator standard compatible rescue communication module
- Backup for obsolete PSTN lines
- Limited BMS features
- 16 EOL zones
- RS485 connectivity
- 4 different kind of input
- 3 programmable output
- Remote controllable by SMS or by ETMS Monitoring Software
- Receiving and forwarding SMS
- Local programming by RS232 port
- Password protection
- AC fail delay
- 2 way voice connection
- Volume control by software
- Windows programming software (Windows 98, 2000, XP, Vista)
