

Ultra Thin LED Panel Lights

Available in 12W and 25W Models

The ENSA panel light range are an ultra-thin downlight, designed for areas where conventional lighting may be difficult to install. Each panel light in the range has a depth of only 13mm. Each model also comes with its own transformer.

- Dramatic energy savings over halogen lamps.
- LED downlights can last up to 50,000 hours.
- Cool light reduces the ambient temperature.
- Energy saving and environmentally friendly.
- No warm up or cool down periods - instant on.
- Resistant to shock and vibration.
- No audible buzzing sounds or light flickering.
- No UV or IR radiation; reduce carbon emissions.
