:: Package Includes

Model: NVR4ENTPACK

1x 6CH Network Video Recorder with 1TB Hard Disk Drive

- Advanced H.264 video compression technology for high quality images and small files sizes.
- Internal 1TB hard disk drive allows for long recording.
- Remote access via computer or smartphone.
- Easy to operate via USB mouse.

1x HDMI Cable and USB Mouse

- One metre HDMI cable for connecting your network video recorder to a high definition television or monitor.
- USB Mouse.

2x Switch Mode Low Voltage Power Supplies

- 1x 48V DC supply for use with PoE Network Switch.
- 1x 2 Amp 19V DC supply for use with the NVR advanced switch mode technology.

6x CAT5 Network Cables

- Carries both power and video for the cameras. Various lengths for cameras & switch use:
 - 2x 15m Cable
 - 1x 20m Cable
 - 2x 10m Cable
 - 1x 30m Cable

4x 1.3 Megapixel Day/Night Surveillance Cameras

- Superior image quality - 1.3 Megapixel maximum resolution (1280x1024).
- 35x infrared LEDs for viewing in total darkness up to 20m.
- IP67 - Weatherproof and compact size make it ideal for indoor/outdoor applications.

1x Power Over Ethernet (PoE) Network Switch

- Power your cameras and retrieve video data over the same cables.
- Provide a uniform and continuous power source for your cameras.
- Centralise your cameras.

1x Infrared Remote Control

- Infrared remote control for interaction with NVR.
- Controls include zoom, channel select, display mode, playback control and more.

4x CCTV Warning Stickers

- Highly visible UV resistant warning stickers for maximum visual deterrence.

System Features

Easy Set Up:

The NVR4ENTPACK includes everything you need to get your home or business security up and running with Megapixel quality! Simply plug in and power up the NVR, PoE Switch and Cameras. Then connect the NVR to your Monitor or TV with the included HDMI cable and you're ready!

Easy Operation:

Easy to operate with the included USB mouse and IR Remote Control. View Live, Record, Playback, Backup and View over a network all at the same time!

Megapixel Quality:

The NVR4ENTPACK includes 4x 1.3Mp Day/Night Cameras with Infrared illuminators, which can be expanded up to 6 cameras total. Each camera capable of giving a crisp HD resolution of 1280x1024 @ 30 Frames Per Second, which is up to 12x higher than any traditional Analogue CCTV system.

Advanced H.264 Video Compression Technology:

H.264 Video Compression Technology provides you with the highest quality image recording while reducing file sizes, to maximise the storage capacity. This will also allow fast image retrieval over your local network or internet connection.

The included 1TB hard disk can record for approximately 2 weeks with all 4 cameras set to a resolution of 720P @ 15FPS per camera. This should be ideal for most situations however you can easily adjust the record settings for higher Image Quality or greater storage times in order to meet your needs. When the HDD is full, the NVR will automatically record over the oldest footage.

Intelligent Video Recording:

The NVR is initially set to record 24 hours a day, 7 days a week and never miss a thing! Alternatively you can enable the video Motion Detection which will dramatically increase video storage times by only recording when movement is detected by each camera. Motion Detection allows you to maximise Hard Disk storage and makes reviewing of footage much faster. Motion Detection can be used all the time or only during scheduled times.

Remote Network Surveillance & Backup Functions:

If you choose to connect your NVR to a local computer network, you can view your NVR locally via a Windows PC, Mac, or supported Smartphone (over WIFI). If your network has an ADSL2 internet connection, you can also remotely view the NVR over the internet from anywhere in the world via any Windows PC, Mac, or supported Smartphone.

The NVR also enables you to backup and archive footage from the NVR to a USB drive or PC.

This product does not include a monitor, laptop or mobile phone. Images are for illustrative purposes only.

The Amazing Advantages of Megapixel CCTV Systems

D1

CIF

1.3 Megapixels

1.3 Megapixels of Performance

The four 1.3 Megapixel Day/Night cameras bundled in this package have a maximum recording resolution of **1280 x 1024**. This is approximately three times the resolution of D1 (720x576) cameras and twelve times greater than traditional CIF (352x288) resolution.

The resolving power of the Watchguard™ NVR4ENTPACK allows for greater surveillance area coverage, providing larger images and finer detail.

Watch Over the Internet from Anywhere!*

PC & Smartphone Remote View

This Watchguard™ CCTV System is capable of offering mobile surveillance via popular smartphone/tablet operating systems such as **iOS** on the **iPhone & iPad**, **Google Android**, **Symbian**, **Blackberry** and **Windows Mobile**.

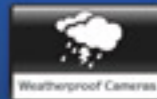

Network surveillance can also be accessed through a web browser.

* Broadband internet required for remote access.
