Megapixel 4 Channel H.264 Network Video Surveillance Kit with 1 TB Hard Disk

Using the latest in digital camera technology the NVR4ENTPACK is a simple solution to record high definition surveillance footage in your home or small business.

Featuring 1.3 Megapixel Day/Night ethernet cameras with H.264 compression which provide high quality video at a fraction of the hard disk space, motion detect recording, scheduling and network feed access, this package contains everything you need to record and monitor your facilities. The system has been designed to allow a quick and simple installation and comes with an easy to follow operation manual.

The NVR can record up to 30 image frames per second per camera at 1.3 Megapixel resolution (1280 x 1024). You can adjust the recorder settings for both image quality and frame rate and when the HDD is full, the NVR will automatically record over the oldest footage. Video can be viewed from either a local machine or over the internet using a web interface or smartphone application. Backups can be made via USB flash or USB hard-drives.

Package Includes:

1 x 6 Channel H.264 Stand Alone Network Video Recorder With Remote Access & 1TB Hard Drive

- Advanced H.264 video compression technology
- Multiplex operation
