

## OPERATING INSTRUCTION

Model: PSLEADCHRG 12V Lead Acid Battery Charger

This charger is specially designed for charging Lead-Acid batteries.

- 1) Connect the charger's connectors to the Lead-Acid battery correctly. Red wire to positive terminal.
- 2) Plug the charger into a standard household AC outlet. When the charging starts, the LED will remain on
- 3) When the battery is charged, the charger will switch to trickle charge automatically. The charging indicator will flash to show that the unit is operating in trickle charge state.
- 4) When you finish recharging, disconnect the unit from the AC outlet, then disconnect the battery from the charger. Never disconnect the battery connector by pulling on the wires.
- 5) Once the charger is disconnected from the AC outlet, or the battery is disconnected from the charger, it will be reset automatically, allowing the next charging to begin immediately, following the above steps.
