

RHINO TRACKS STANDARD GPS VEHICLE TRACKER

Product Code: RHINO TRACKS-ST5

ABOUT YOUR RHINO TRACKS-ST5

This user guide covers the installation and operation of your RHINO TRACKS-ST5. The latest version of this document is always available on the Rhino Tracks website. We suggest you visit the website and download the latest version, to ensure you have the most up to date and reliable information.

The RHINO TRACKS-ST5 is a vehicle tracking and car alarm system. It provides vehicle security and remote GPS tracking in one unit. You can monitor a vehicles location and control the car alarm remotely. In addition, the unit will can send event reports for a range of triggers and has 8 outputs and 5 inputs for performing alarm functions.

The RHINO TRACKS-ST5 comes pre-configured with a SIM card installed. To get the tracking system up and running, you simply need to install the unit as per the included wiring diagram then browse to www.rhinotracks.com.au

Your RHINO TRACKS-ST5 will automatically report its position to the Rhino Tracks server every 15 seconds while the unit is powered on.

POWER OPTIONS

Most installations will use the car ignition wire for power, in effect ensuring that the vehicle is tracked when being driven. If you would like the unit to be tracked constantly, 24 hours a day, you should obtain a secondary battery for the device. Most car batteries are not designed to run devices constantly. You should contact your installer or an auto-electrician for more information on a suitable power solution.

TRACKER INSTALLATION

For basic tracker functionality:

1. Connect GSM Antenna Cable
2. Connect GPS Antenna Cable
3. Connect the BLACK loom wire to -12v battery
4. Connect the RED loom wire to +12v battery with 5 Amp fuse in place

For more information on car alarm functionality, please contact our technical support team.
