

# Wireless Mini Numeric Keypad

Available in Black or White

Actual Size Shown: 45 x 55mm

**Suitable for:**

**Home, Office, Vehicle and Marine**

Wireless Keypad allows multi-user PIN number control of arm/ disarm function as well as all other remote functions. Wall mounted or portable. Also suitable to apply on car for extra security.

- Prevents unauthorised use due to loss of remote controls.
- Where the added security of a PIN number is required to activate the system, with the added ability to easily change the PIN number at any time i.e. when staff are terminated.
- For use with hardwired alarm systems where it is impossible or not cost effective to run a keypad to the preferred customer's keypad location.

## Features

- Secure user programmable 4-Digit PIN number to avoid unauthorised use
- Long Life Lithium Batteries
- Up to 7 secure transmission channels
- Backlit buttons for use during low light conditions
- Audible low battery warning
- Audible confirmation for each button press and on correct PIN number entry
- Wall mountable or portable
- SAW locked transmitter will never drift off frequency for reliable operation
- Concealed on-board antenna
