

# PROFESSIONAL BACK TO BASE MONITORED WIRELESS ALARM SYSTEM FOR HOME OR OFFICE

**EASY  
TO  
INSTALL**

The Watchguard™ Wireless Alarm System is a true revolution in monitored alarm systems. Utilising advanced wireless technology means installation is very simple, and the wireless design allows you to expand / relocate the system at anytime.

To install, simply mount the Wireless Movement Sensors in a suitable position, connect the Communication Dialer plug-pack to a power-point, plug the phone lead into a phone socket and then register with your Alarm Monitoring Centre.

Use the Remote Control Button to arm the system before you leave your premises. If movement is detected after the system has been armed, the communication dialer will transmit the detailed alarm activation data (Contact ID Format) via phone line to your monitoring centre for appropriate response action to be taken.

## Package Includes:

- 1 x Communication Dialer Alarm
- 2 x Wireless Movement Sensors
- 2 x Code Hopping Remote Controls
- 1 x 9V DC Power Supply for the Communication Dialer
- 1 x Phone Lead to connect the Dialer to your phone line

## How The System Works:

### 1 WIRELESS MOVEMENT SENSORS & REMOTE CONTROLS

Use your Remote Control to arm the Watchguard™ Wireless Alarm System. When movement is detected in your premises, the sensors will automatically transmit a radio signal to the Communication Dialer.

### 2 COMMUNICATION DIALER ALARM

This is the "brain" of the system. When it receives an alarm code from the Wireless Movement Sensors, it automatically sends your alarm activation data to your monitoring centre via your phone line. The in-built siren will also sound to repel the intruder.

### 3 ALARM MONITORING CENTRE

Your alarm monitoring centre will receive the data from your system and your designated contacts will be notified as per your instructions. Please contact your preferred monitoring service provider to discuss their individual monitoring service plans, notification method and charges.

### 4 ALARM NOTIFICATION

"Hello John. This is Sally from the Monitoring Centre. Your Watchguard™ Wireless Alarm System at 1 Smith Street Sydney has been activated by the Movement Sensor in your lounge room."
