Home Alarm System

WIRELESS SECURITY SYSTEM FOR YOUR HOME OR OFFICE

SYSTEM INCLUDES:

2 x High Security Code Hopping Remote Controls

These allow you to easily arm and disarm the system from anywhere in your home without having to remember a pin number or always enter/exit through the same door to access a keypad. In case of duress, you can trigger your Watchguard Home Alarm System at any time from the remote control. You can also arm only certain areas i.e. at night you can have the sensors in your living areas armed, but those in your bedrooms disarmed.

2 x Wireless Passive Infrared Sensors

Designed to detect the body movement of an intruder inside your premises. These intelligent devices allow simple installation, as no cable is required between the main unit and the sensors. The long life lithium batteries will last for up to 3 years, and the system will automatically let you know when the batteries need replacing.

1 x Main Control Unit

This is the "brain" of the system, and is designed to be easily mounted under an eave. The unit incorporates a powerful siren, flashing blue strobe & backup battery to run the system in case of mains power failure. There is also a tamper button to trigger the siren in case anyone tries to remove the unit. The system has mains connection via a low voltage plugpack that is supplied with the unit. For peace of mind, you are also supplied with 2 x high security keys, so that in case you lose a remote control, you can manually disarm the system via the mechanical keyswitch built into the main unit.

1 x High Power Internal Siren

This high frequency siren generates an intolerable noise to the human ear, and is designed to help repel intruders from within your home. It mounts easily to the roof of one of your rooms, and is simply cabled back to the main control unit (10m of cable is provided).
